## Proceeds to go towards the Marine Mammal Strandings Program

As with any specialty license plate, supporters are required to gather 2,000 signatures along with a \$25.00 deposit from those who are interested. The Legislature must also approve the proposed request.

Department of Marine Resources (DMR) is federally authorized to respond to live and dead stranded whales, dolphins, porpoises, seals and sea turtles from Kittery to Rockland, Maine. We field these calls through a 24-hour reporting hotline. Many hours are spent on the phone and on the beach by staff and volunteers educating the public about what to do when a marine mammal strands on Maine's shore. Revenue from this plate will help support the mission of DMR's Marine Mammal Strandings Program, which is dedicated to the conservation of marine mammals through response and rescue of distressed, sick, injured and orphaned marine mammals, research and educational activities for students and the general public. We know that many Maine people will want to help by signing up for a license plate. If you are interested in helping out, then please sign up for your plate today.
